ProPlex FX Series Trading Computer

The ProPlex FX trading computer is built on the new Intel LGA 1156 architecture, which features the i3, i5, and i7-core processors. It is specifically built for traders to run multiple monitors so that they may have simultaneously open charting windows. The ProPlex FX allows for monitor customization of up to 16 monitors (see our Ikon GTR series for up to 28 monitor capability). It's base configuration will power 2 monitors up to 30" in 2560 x 1600 resolution via DVI outputs. The ProPlex FX is a reliable, fast, & future-proof trading computer that will allow you to work freely without the headaches of slow hardware.
